

GM Ordering Process

1. Pull Parts Requests

- Throughout the day, all **CSO and OVN** parts that need to be ordered for service and customers.

2. Submit Daily GM Order

- Submit all CSO and OVN parts to GM **every day at 1:50 PM**.

3. Review Order Results

- After submission, review the order to see what filled and what went on **backorder**.

4. Open SPAC Cases

- Any part that goes on backorder gets a **SPAC case** opened immediately.

5. Update Tekion

- Enter the **SPAC case number** in the **comments section in Tekion** so everyone can see the status.

6. Communicate with Service Advisors

- Notify the **service advisor** if their part is on backorder and let them know a SPAC case has been submitted.

7. Receive and Check In Parts

- As parts arrive, receive them in the system and verify they're correct and accounted for.

8. Notify When Parts Arrive

- For **service orders**, notify the service advisor that the parts are here.
- For **over-the-counter customers**, contact the customer to let them know their part has arrived.

9. Weekly Unbilled Parts Report (Every Wednesday)

- Send an email to the **Fixed Ops Director** and **Service Director** listing parts that have been **received for the service department but not yet billed out**.
